Deconik speaker vibration dampening pad

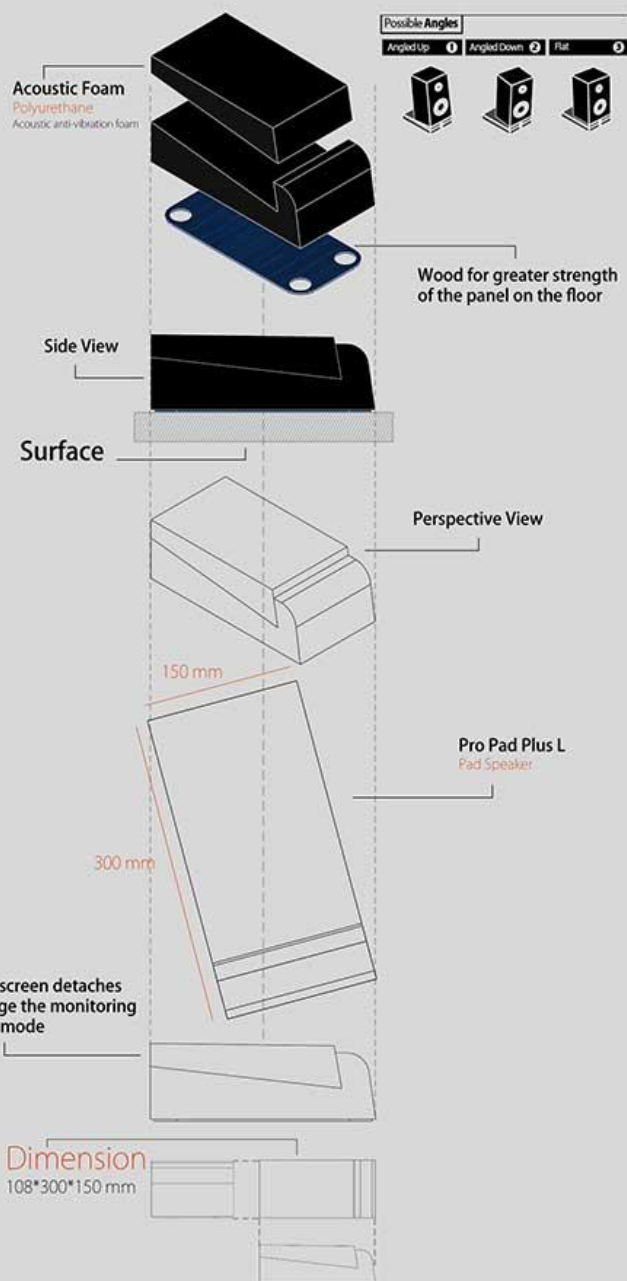

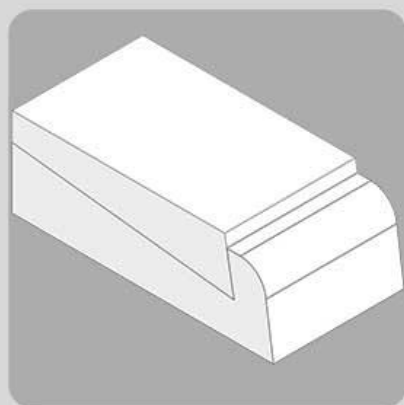

This model in the package includes 2 pieces with the following dimensions.

The pro pad plus-L package includes 2 panels with dimensions (cm) of 10.8-15-30.

This is a new sample in Deconik acoustic panel group, which is designed to prevent sound resonance and vibration caused by monitors and speakers.

Deconik sound dampening pedal for the speaker to isolate the space around the monitors, which brings clarity of sound, simple and effective design.

Another layer has been added on the pad to make the monitor more stable on the pad. The foam structure is produced with high density to absorb vibration and lack of sound resonance.
