

Installation

Quad is a versatile, effective and efficient panel in the audio and acoustic market. It is made entirely of high-performance mono-foam for home recording studios and mix rooms. Simple and perfect design is a suitable addition to your space and professional studio. Dual-purpose panel for audio treatment and hiding cables from public view to maintain a more beautiful appearance. We recommend to install and use in home studios and singing studios.

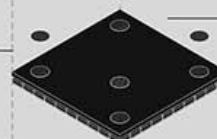

Acoustic Foam

Polyurethane
calibrated open cell acoustic foam
