STUDIO DESK PLUS

Features for the modern musicians

Ergonomic knowledge allows humans to work best in a variety of environments and environments. Nowadays, ergonomics lead to the design of devices and systems that lead to increased and improved mental health and more human performance.

The design of the studio tables has been designed in accordance with the same principle, which is a simple and economical example. A simple and beautifully designed, wood-framed woodwork that fills your space of 2 square meters, and the bottom slider to control the keyboard and midi controller, which will prepare you to create the best music in standard conditions.
