Features for the modern musicians

When designing any product, we need to consider your workflow. To create a piece of music, you need to get inspired. Your inspiration depends very much on your work environment. If something fades away your creativity during the creative process, the inspiration of your mind will be considerably reduced.

Our main focus is the creation of a beautiful, organized environment that you always want to have a basic purpose of this production, to improve the way of work, methods and tools of work and to adapt them to the physical and mental characteristics of humans.

The creator of music with a special

sensitivity In order to see the ergonomic and practical aspects, with a great deal of attention to the apparent beauty that creates a unique workstation, everything is in the right place. Put your equipment on the table and release your creativity.

So, in order to accomplish these goals, he has produced his own ergonomic and used ergonomic tables. Using high-quality materials, wooden studio stools are designed and manufactured in two simple and advanced designs. This sample only fill 2 square meters of space.. It has a large desktop surface, two loops of sufficient length and an appropriate angle. To your seat, for the three 21-inch screens, and monitors and keyboards with easy access and large cable management under the main table hidden from view. Also, the home screen slider is provided for easy access to the keyboard, midi controller, and the use of SMD lights for greater brightness and beauty.

It's worth noting that the use of SMD lights does not cause noise in the environment, the ratio of remaining light sources, including fluorescents. We know that easy assembly is important to you. Our desk is designed to be assembled without drilling by anyone. To make things easier, we made a movie step by step.

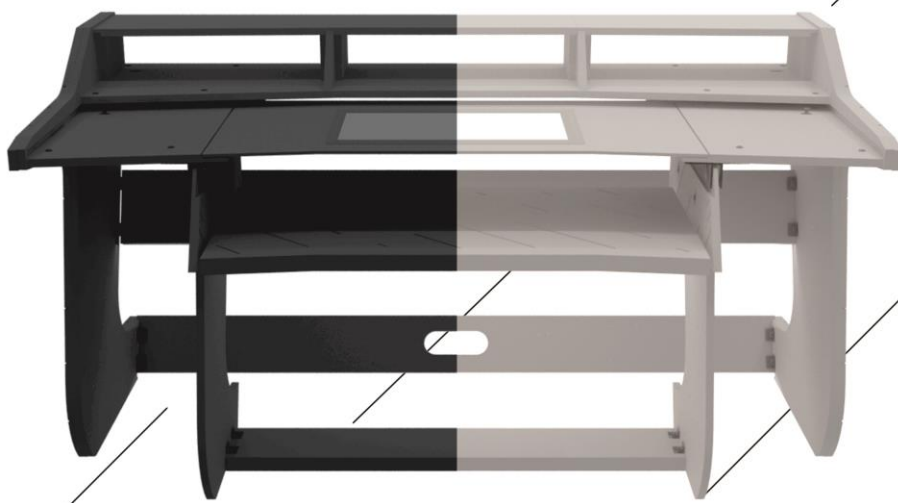

All components of the connection are mentally planned. If necessary, your desk can be easily separated and re-assembled in another place. This design is made according to the aesthetics and modern look.
